

CODIS™ 95

**Neutralising Alkanol-Amines
Co-dispersant**

ADDAPT[®] CODIS[™] 95

CODIS[™] 95 is a proprietary blend of specifically tailored low odour alkanol-amines in water.

It is a special blend to generate a customized property profile.

ADDAPT[®] CODIS[™] 95

ADDAPT
Chemicals BV

Properties

- ✓ pH-stabilizer
- ✓ Co-dispersant
- ✓ Anti-corrosion
- ✓ Emulsifier

ADDAPT[®] CODIS[™] 95

pH-stabilizer

CODIS[™] 95: a long term stable and effective pH-stabilizer for water based paints, plasters and lacquers.

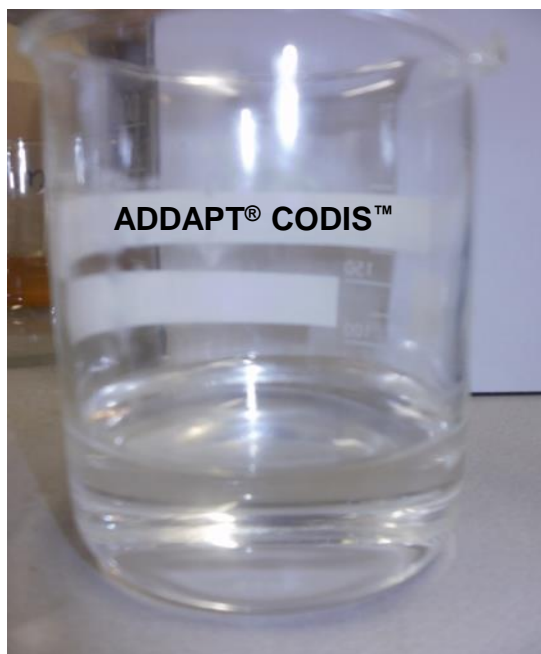

CODIS[™] 95: evaporates the same way as Ammonia, but having the advantage of low odour.

No formation of additional salt in the film like competitor products (and sodium hydroxide). It ensures long term storage stability in formulated products.

ADDAPT[®] CODIS[™] 95

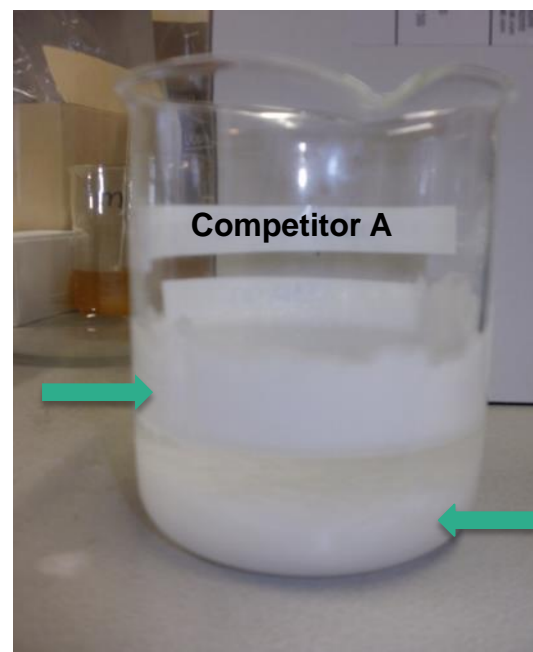

ADDAPT[®] CODIS[™] 95

- Evaporation 100% faster
(i.e.: early water resistance is better)
- Storage-stable even after three weeks
- Storage exposed to air: no reaction!

Competitor A (2-Amino-2-Propanol)

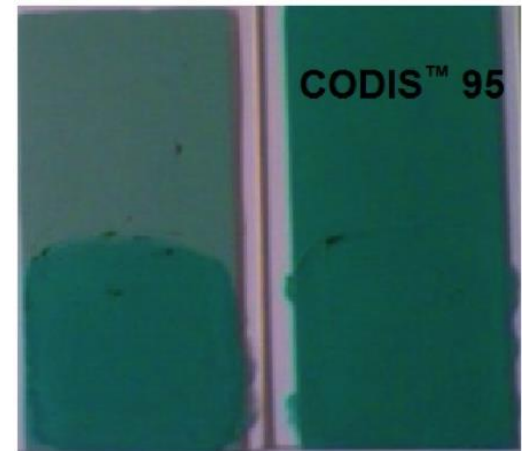

- Slow evaporation
- Reaction visible after one week
- Significant crystallization and gel forming

ADDAPT[®] CODIS[™] 95

Co-dispersant

CODIS[™] 95: effective co-dispersant for pigments/fillers and very suitable for colorants.

Benefits

- ✓ Optimizes pH at grinding phase
- ✓ Increases the effectiveness of dispersing additives
- ✓ Minimizes the risk of “rub out”
- ✓ Stabilizes binder with nano-silica (**COL.9[®]**)

ADDAPT[®] CODIS[™] 95

Anti-corrosion

CODIS[™] 95: prevents corrosion - especially useful for the protection of aerosols in cans containing water based paints.

CODIS[™] 95: alkalinity enhancer - provides corrosion inhibition properties in metalworking fluids.

ADDAPT[®] CODIS[™] 95

Emulsifier

CODIS[™] 95: very useful neutralizer for acid functional resins; it making them suitable for usage in water.

CODIS[™] 95: effective emulsifier for Polyethylene Wax when using normal or pressure emulsification techniques.
